## Why? - Problem

Unclear perception of students of what is expected - based on survey.  
Differences in the **quality of outputs**.

## What? - Goal

Elevate the **quality of the outputs**.  
by **improving the understanding** of students.

## How? - Innovation

**Co-creation of assessment criteria** improve understanding.  
**Students will become our partners**.

## History of innovations

This course has been constantly responding to challenges and innovating:

- 2021/2022 Challenge-based education
- 2022/2023 Real-cases introduced
- 2023/2024 **Co-creation**

## Hypotheses

**H1:** Inclusion to creation of assessment criteria will develop a better understanding of the task and the development of student's self-evaluation skills.

**H2:** Because of the development of self-evaluation skills the quality of the final deliverables – policy papers will be increased.

## Methodology

Comparison of:  
**Students' survey results**  
**Quality of deliverables**  
**Feedback from external stakeholder**

## Learning Outcomes

**Design and formulate** a proposal for assessment criteria.  
**Evaluate** the work of your peers based on the criteria.  
**Assemble** the final evaluation criteria.

## Results

Students reported an **improvement in understanding**.

The deliverables were assessed by a **better rating** based on the criteria that student proposed.

The partner confirms **higher quality**.
